PROJECTS

Ghrepo

<https://github.com/cdelauder/ghrepo>

Ghrepo is a gem which allows you to create and clone a repository from the command line, with the option of adding rails or html in an initial commit.

- Built exclusively in Ruby and available through RubyGems
- Won 2nd place in the Dev Bootcamp Alumni Hackathon

GameBuzz

<http://red-admirals-2014.github.io/game-buzz/>

GameBuzz is a 2 player trivia game.

- Entirely client-side Javascript and jQuery with a Firebase database to sync gameplay
- Created my own promises and callbacks to handle synch Javascript
- Wrote the Firebase calls and listeners
